

Heavy Duty Trackers

PRODUCT FACT SHEET

The TS Global range of heavy-duty trackers are engineered to maximise conveyor belt longevity by ensuring precision tracking under the most demanding conditions.

Our design prioritises low maintenance and is custom-manufactured to suit each specific application. Unlike standard units, these trackers utilise a robust pivot plate assembly rather than a bearing, significantly increasing durability while requiring minimal maintenance.

Constructed from 304 stainless steel and featuring solid servo rollers, this range is built to withstand any operational environment. By reducing maintenance downtime and eliminating spillage at loading and head transition areas, Tuff Trak provide a cost effective, low maintenance long-life solution.

FEATURES		BENEFITS
Manufactured from high grade stainless steel	=	Increases longevity in structural components
Pivots on a thrust plate	=	Ensures continual free flowing operation
	=	Increases longevity eliminating the need for greasing
	=	Eliminates bearing failure
Custom made to suit specific conveyors	=	Ensures unit will bolt directly onto structure without the need to modify
	=	Eliminates hazards associated with site modifications
Robust design	=	Provides structural integrity in heavy duty applications
Designed to accommodate site rollers	=	Utilises existing site roller stock
Supplied with 100mm diameter heavy duty servo rollers	=	Ensures long life under extreme conditions
	=	Minimised risk of belt damage
