

Off-Site Services

SUPPORTING CONVEYOR
RELIABILITY BEYOND SITE

- ▶ FABRICATION AND WELDING SERVICES ▶ GENERAL MACHINING
- ▶ MECHANICAL OVERHAULS ▶ QUALITY ASSURANCE & CONTROL SERVICES (QA/QC)

Why TS Global?

National Workshop Capability

- ▶ Workshop facilities across NSW, QLD and WA
- ▶ Consistent service standards across our operations
- ▶ National capability supporting the bulk handling industry

Engineered Workshop Solutions

- ▶ Manufacture, refurbishment, repair and overhaul
- ▶ Fabrication, welding and precision machining
- ▶ End-to-end support for conveyor equipment

Quality & Reliability

- ▶ Rigorous quality assurance and control processes
- ▶ Controlled workshop environments for consistent workmanship
- ▶ Equipment prepared and verified before returning to site

Technical Expertise

- ▶ Qualified and experienced tradespeople
- ▶ In-house engineering, design and drafting support
- ▶ Specialist fabrication, machining and overhaul capability

Nationwide Workshop Services.

Comprehensive off-site support that reduces site downtime and returns your equipment ready for installation.

TS Global operates facilities across New South Wales, Queensland and Western Australia, providing comprehensive off-site services for the manufacture, refurbishment, repair and overhaul of conveyor equipment.

Working in controlled workshop environments allows our experienced teams to deliver consistent, high-quality workmanship while minimising time lost on site and ensuring equipment is ready for installation.

Our capabilities are supported by qualified tradespeople, in-house engineering expertise and rigorous quality assurance, delivering reliable solutions for mining, quarrying and bulk material handling operations.

Fabrication & Welding Services

Certified fabrication and welding built to standard, for conveyor equipment and structures that last.

Our team specialises in stainless steel and mild steel fabrication, producing high-quality conveyor equipment and structural components. Welding is carried out to NATA-endorsed procedures in accordance with AS/NZS 1554 and to customer-specific requirements. Qualified in-house International Welding Specialists (Weld Australia IWS) and AS 2214 Welding Supervisors ensure every job meets the applicable standards.

➤ SERVICE INCLUDES

- ▶ Conveyor pulleys
- ▶ Belt winders
- ▶ Transfer chutes and loading zones
- ▶ Reclaim feeder breakers
- ▶ Conveyor guarding and roller frames
- ▶ Platforms
- ▶ General conveyor structures

General Machining

Available in New South Wales and Queensland only.

Accurate machined components that keep your conveyors running.

TS Global offers a comprehensive range of precision machining services to support the manufacture, repair and refurbishment of conveyor components. Working across metals, plastics and composites, our experienced machinists deliver accurate, high-quality results for a broad range of industrial applications.

➤ SERVICE INCLUDES

- ▶ CNC and manual lathe turning
- ▶ Milling
- ▶ Drilling
- ▶ Surface grinding
- ▶ Boring

QUALITY-CONTROLLED

MANUFACTURING

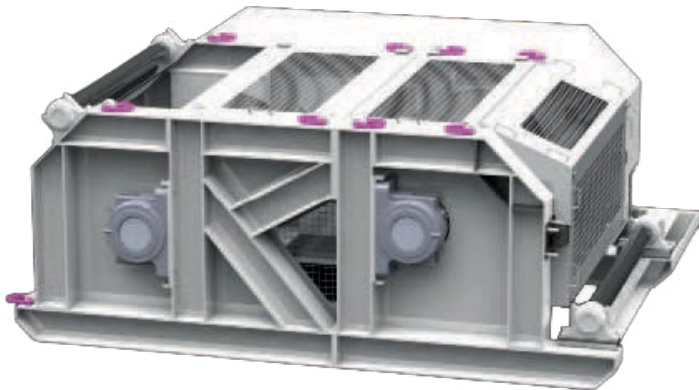

COMPLETE
LIFECYCLE SUPPORT

Mechanical Overhauls

Restore reliability and extend the service life of your critical equipment.

Our mechanical overhaul services restore critical conveyor equipment to optimal working condition, improving reliability, extending service life and helping reduce unplanned downtime.

- SERVICE INCLUDES
- ▶ Conveyor pulleys
 - ▶ Gearboxes
 - ▶ Underground jibs, loop take-ups and boot ends
 - ▶ Drive-heads
 - ▶ Development, jiffy, nifty and combi drives
 - ▶ Belt Repairs

DETAILED INSPECTION

QUALITY ASSURANCE

Quality Assurance & Control Services (QA/QC)

As part of our ISO 9001 Certification, we offer a comprehensive range of QA/QC services tailored to meet your specific needs. From non-destructive testing (NDT) to factory acceptance testing (FAT) and trial assembly, we provide solutions to ensure quality and reliability.

TS Global has invested in advanced clean rooms to ensure contamination-free assembly processes. These controlled environments prevent foreign material ingress, guaranteeing high-quality products and demonstrating our commitment to quality products.

We also offer third party Non-Destructive Testing (NDT) such as ultrasonic testing and magnetic particle inspection, we assess your equipment's integrity without causing damage. Our meticulous FAT process verifies that your machinery meets specifications before installation.

CONVEYOR PULLEY SERVICES

TS Global also provides specialised pulley manufacture and refurbishment services. For detailed information about these capabilities, please refer to our Conveyor Pulleys brochures.

POLYURETHANE

TS Global also provides specialised polyurethane design and manufacturing services. For detailed information about these capabilities, please refer to our Polyurethane brochure.
