

Floating Failsafe Vee Plough

PRODUCT
FACT
SHEET

The range of TS Global ploughs are proven to protect and increase the life of your capital assets including pulleys and conveyor belt. This is achieved by removing displaced material on the return side of the conveyor belt prior to entering the pulley. It also improves tracking by reducing build-up on the pulley.

Balancing cost effectiveness with long life functionality makes this the ideal choice for your application.

Application

Prior to drive, bend, take-up and tail pulley on single direction conveyors only.

-  Proven Performance
-  Quality Product
-  Flexibility in Design
-  On-time Delivery

FEATURES		BENEFITS	
Manufactured from high grade stainless steel	=	Increases longevity in structural components	
Supplied with dual pole configuration	=	The geometry formed between poles, link arms and body provides fail-safe integrity	
Available in standard and heavy duty	=	Manufactured to fit your application	
	=	Cost effective option	
Components are interchangeable with most brands	=	Cost savings achieved without the need to replace the plough	
Plough floats with belt movement	=	Continually self-adjusts to optimise performance	
Ability to supply blades with different wear characteristics to suit your specific applications	=	Increases life expectancy of polyurethane blades	
	=	Optimises performance due to correct blade selection
