

# Dimpled Ceramic Lagging

PRODUCT  
FACT  
SHEET

The range of TS Global ceramic pulley lagging has been engineered to provide an accentuated positive drive between pulley and belt, especially in conditions that normal rubber lagging would not accommodate.

Our dimpled ceramic lagging excels in challenging environments and offers improved defence against wear, thus reducing maintenance.

Balancing cost effectiveness with long life functionality makes this the ideal choice for your application.

## Application

All conveyor drive pulleys.

-  Proven Performance
-  Quality Product
-  Flexibility in Design
-  On-time Delivery

FEATURES	BENEFITS
Manufactured with CN bonding layer	= Delivers rubber tear bond to the shell which increases longevity
Manufactured with 92% aluminium oxide tiles	= Extreme wear resistance of lagging
	= Reduces maintenance
	= Reduces hazards associated with re-lagging the pulley
Manufactured with raised dimples	= Increases drive efficiency and improves belt grip
Ceramic tiles bonded to rubber on all edges	= Superior bond and tile pull-out (rubber tear)
Factory buffed back and edges	= Eliminates hazards associated with buffing
	= Reduces installation time and cost
Manufactured to suit specific belt widths	= Reduces wastage
Can be installed in-situ without having to remove the pulley	= Eliminates hazards associated with removing pulley
	= Reduced costs associated with removing pulley and crane hire
Manufactured with cutting sypes	= Allows easy adjustment of strip width to pulley diameter
Lagging packed in plastic film	= Eliminates contamination of the buffed bonding layer

\*Available in natural (SBR) and fire resistant anti-static (FRAS) compounds
