

Enclosed Water Control Unit with Bypass

PRODUCT
FACT
SHEET

The range of TS Global water control units assists with delivering the benefits of a superior wet cleaning system. They are designed to control water quality, pressure and enhance cleaning performance of any belt cleaning system. Water spray systems improve cleaner performance by up to 75% over dry systems and the water control manifold plays a huge part in this.

Balancing cost effectiveness with long life functionality makes this the ideal choice for your purpose.

Application

All wet belt cleaning systems to a maximum pressure of 1380 kPa.

-  Proven Performance
-  Quality Product
-  Flexibility in Design
-  On-time Delivery

FEATURES	BENEFITS
Stainless steel, weatherproof, sloped roof cabinet	<ul style="list-style-type: none"> = Easy access via hinged door = Increases life expectancy = Reduces build up on top of panel
Lockable cabinet	<ul style="list-style-type: none"> = Controlled access for maintenance personnel = Reduces tampering by unauthorised persons
Supplied with a by-pass line	<ul style="list-style-type: none"> = Allows water control unit to be maintained while conveyor and sprays remain in operation
Contributes to performance enhancement of all conveyor belt cleaning systems	<ul style="list-style-type: none"> = Improves cleaning performance by up to 75% = Prolongs service life of conveyor belt and cleaner
Manufactured with a high-grade stainless steel reusable water filtration device	<ul style="list-style-type: none"> = Prevents build up/blockage of nozzles = Allows cleaning to be completed during routine maintenance
Integrates with existing conveyor drive controls or PLC system	<ul style="list-style-type: none"> = Ensures spray operation is controlled in-line with client requirements
Available in a range of solenoid types and voltages	<ul style="list-style-type: none"> = Compatible with site electrical requirements
Water filters available in 150uM and 560uM	<ul style="list-style-type: none"> = Minimises spray blockages
