

Spray Bar with U Bolt Mount

PRODUCT
FACT
SHEET

The range of market leading TS Global spray bars provides a cost effective solution when upgrading a dry cleaning system to a high performing wet cleaning system.

The spray bar plays an integral part in the reduction of carry-back reducing safety hazards and environmental impact around the conveyor. A wet cleaning system operated by our water control manifold ensures the cleaners are performing at the optimum level, thus reducing wear to the conveyor belt, return rollers and pulley lagging.

Balancing cost effectiveness with long life functionality makes this the ideal choice for your application.

Application

Can be used to upgrade any dry belt cleaning system to a wet belt cleaning system.

-  Proven Performance
-  Quality Product
-  Flexibility in Design
-  On-time Delivery

FEATURES	BENEFITS
Manufactured from high grade stainless steel	= Increases longevity in structural components
Performance enhancement for all conveyor belt cleaning systems	= Improves dry belt cleaning system performance by up to 75%
	= Prolongs service life of conveyor belt and cleaner tips
Dust suppression and chute cleaning at transfer points	= Reduces build-up in transfer points
	= Reduces dust around head chute
Lightweight construction	= Efficient and safe removal from installed position
	= Reduces hazards associated with manual handling
Maintenance does not require removal of belt cleaners	= Reduces hazards associated with manual handling
	= Reduces maintenance cost
