

# Spray Pole R Tungsten Belt Cleaner

PRODUCT  
FACT  
SHEET

The range of TS Global belt cleaners are guaranteed to reduce carry-back, safety hazards and environmental impact along the conveyor. Working in conjunction with a primary cleaner, the spray pole R belt cleaner operated by our water control manifold ensures the cleaners are performing at the optimum level, thus reducing wear to the conveyor belt, return rollers and pulley lagging. The sprays are incorporated within the main support pole and play an integral part in the reduction of carry-back. This significantly reduces safety hazards and environmental impacts around the conveyor. Balancing cost effectiveness with long life functionality makes this the ideal choice for your application.

## Application

Installed at the head end or discharge point of any conveyor belt. Suitable to single and bi-directional conveyors. Suitable for use on vulcanised conveyor belts only.

-  Proven Performance
-  Quality Product
-  Flexibility in Design
-  On-time Delivery

FEATURES	BENEFITS
Performs final cleaning ensuring up to 98% of fines are removed	= Fines are returned to the product flow, maximising revenue
Manufactured from high grade stainless steel	= Increases longevity in structural components
Water sprays incorporated within the main support pole	= Improves cleaner performance by up to 300%, in particular where sticky material is conveyed = Extends life of cleaner components and conveyor belt due to water acting as lubricant and reducing wear
Manufactured in either standard, heavy duty or super pole configuration	= Allows the duty of the cleaner to be matched to the size and speed of the conveyor
Supplied with bolt-on tungsten tips	= Allows alignment of cleaning elements to deliver optimum performance = Increases life expectancy of tungsten tip = Minimises maintenance costs
Choice of high grade tungsten tip thickness	= Increases life expectancy of tungsten tip = Minimises maintenance costs = Optimises performance
Our components are interchangeable with most brands	= Cost savings achieved without the need to replace the cleaner
Supplied with unique two-piece clamping system	= Allows the pole to be supported while removing cleaner
Individual cleaning segments allow cleaner to conform to belt profile	= Optimises performance
