PRODUCT  
FACT  
SHEET

Redi Repair provides a simple, efficient and cost effective solution for a damaged or torn conveyor belt. It delivers a fast curing, high quality bond to the belt surface. The two-part 100% solids polyurethane material also provides excellent abrasion and tear resistance. Our Redi Repair accessories have been developed to assist in safe and efficient application of the product by avoiding air entrapment, improving product mixing consistency, minimising waste and increasing productivity

## Application

Suitable for repairs to rubber (fabric and steel cord) and PVC (solid woven) conveyor belts, including repairing tears, spot/punctures, holes, skirt damage, edge damage, splice damage and protecting mechanical fasteners.

Colour:	Red	Hardness:	80 - 85A
Shrinkage:	<1%	Shelf life:	12 months @ 22°C
Working time:	10 to 15 mins @ 24°C	Return belt to service:	4 hr @ 24°C

-  Proven Performance
-  Quality Product
-  Flexibility in Design
-  On-time Delivery

FEATURES	BENEFITS
Fast curing (30 minutes)	= Minimises downtime for maintenance = Increases conveyor availability
Working time of 10-15 minutes	= Increases time for applicators to apply product
High viscosity	= Able to be applied on inclines up to 45 degrees without sagging or slumping
High quality bond	= Increases longevity of the repair over traditional techniques
Excellent abrasion and tear resistance	= Increases life in high wear zones = Increases strength throughout the repair
Light and compact	= Reduces hazards associated with manual handling of capital equipment such as vulcanisers and spot presses
Self-mixing	= Product is automatically mixed to correct ratio via self-mixing nozzle eliminating human error = No-hand mixing required
Cost efficient	= Minimal labour to apply = No hire charge for equipment = Long lasting
