

# Environment and Community Management Policy

## COMMITMENT

The Company, TS Global Pty Ltd is committed to preserving the long-term health, function and viability of the natural environment by minimising the adverse impact of our operations on the community in which we operate.

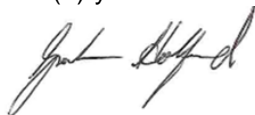

## OBJECTIVES

TS Global shall implement and maintain an Environment and Community Management System in accordance with ISO14001:2015. As part of this, we will:

- provide visual leadership while minimising or eliminating emissions and pollution, to reduce our energy consumption and recycling waste within our operations and the community.
- encourage each worker to take responsibility for their actions, considering potential impacts to the environment and our local community. They will be encouraged to participate in and contribute to, activities directed at maintaining and continual improvement of our processes.
- work with the client, community and other stakeholders to develop a transparent relationship, including the impact of our manufacturing processes and our products on the environment.
- manage our operations with the goal of preventing incidents, controlling emissions and waste below harmful levels and ensure correct storage and handling of hazardous substances and dangerous goods.
- respond safely, quickly and effectively to emergencies or incidents resulting from our activities, co-operating with industry organisations and government agencies.
- maintain and continually develop our procedures as part of the Environment and Community Management System. These procedures define how and when this policy shall be applied.
- undertake scheduled auditing of our Environment and Community Management System to ensure compliance with its measurable objectives and targets.

## MONITORING

TS Global will maintain a suite of procedures as part of our QHSE management system, outlining how and when this policy is applied. This policy will be reviewed every two (2) years.
