

Polyurethane Skirt Products

PRODUCT
FACT
SHEET

The range of TS Global skirting systems ensures maximum retention of dust and product within the transfer chute reducing safety hazards and environmental impact around the conveyor.

Polyurethane skirt material has superior DIN abrasion performance, delivering an extended life over traditional skirt rubber. The reduced friction between the belt and polyurethane skirt minimises wear to the top cover and reduces drag.

Balancing cost effectiveness with long life functionality makes this the ideal choice for your application.

Application

-  Proven Performance
-  Quality Product
-  Flexibility in Design
-  On-time Delivery

FEATURES	BENEFITS
A low co-efficient of friction between polyurethane skirt and the belt	= Reduces drag on the belt = Reduces wear in skirt area
Improved abrasion resistance over traditional rubber skirts	= Extends life = Reduces maintenance
Supplied with a 35° chamfer on one edge	= Allows for more effective sealing
Manufactured from 65 durometer polyurethane	= Minimises wear to the belt
Available in 30m (90ft) rolls	= Eliminates joins in skirt area

*TS Global can supply a full range of skirt systems
